

FIRE SAFETY RULES

Pay special attention to the fire safety rules of the exhibition centre (see the Exhibitor Manual). Follow these rules when designing, building, and decorating your stand with various materials (fabrics, panels, etc.) and arranging the display.

All promotional materials and exhibits must be placed within your stand area. According to the fire safety rules, packing materials and containers are not allowed at the stand. You may arrange for the storage of consumables, packing materials/containers, and exhibits through the Transport and Logistics Department of Crocus Expo IEC.

Smoking, including the use of electronic cigarettes, is prohibited within the pavilions. Designated smoking areas are provided outdoors on the exhibition centre grounds.

The use of open flames, pyrotechnic and smoke effects, as well as the storage and use of flammable materials and combustible compressed gases, is prohibited at the exhibition. If these substances (paints, oils, emulsions, etc.) are part of your display, substitute them with empty vessels (dummies).

When decorating your stand and placing exhibits, please adhere to the rules outlined in the Fire Safety Instructions of Crocus Expo: [Fire Safety Instructions](#).

Any deviations from these rules are allowed only with written permission from the Fire Safety personnel.
